

Peltier-cooled incubator

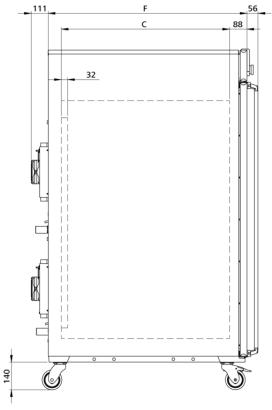

IPP1060ecoplus

Sets eco standards for cultivation below room temperature: unmatched energy efficiency, best values for heat-up, cool-down and recovery times.

With the help of our model selection, with dimensioned model sketches and extensive technical data for download, you will find your perfect Peltier-cooled incubator. Flexibility and technical features of our appliances meet all possible needs. Put us to the test!

Temperature	
Setting temperature range	0 to +70 °C
Working temperature range	without light: from 0 (at least 20 below ambient temperature) to +70°C
Setting accuracy temperature	0.1 °C
Temperature sensor	2 Pt100 sensors DIN Class A in 4-wire-circuit for mutual monitoring, taking over functions in case of an error
Control technology	
ControlCOCKPIT	TwinDISPLAY. Adaptive multifunctional digital PID-microprocessor controller with 2 high-definition TFT-colour displays.
Language setting	German, English, Spanish, French, Polish, Czech, Hungarian
Timer	Digital backwards counter with target time setting, adjustable from 1 minute to 99 days
Function SetpointWAIT	the process time does not start until the set temperature is reached
Calibration	three freely selectable temperature values
adjustable parameters	temperature (Celsius or Fahrenheit), programme time, time zones, summertime/wintertime
Ventilation Convection	forced ventilation by Peltier fan
Communication	
Documentation	programme stored in case of power failure
	programme stored in case of power failure AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port
Documentation	AtmoCONTROL software on a USB stick for programming, managing and transferring programmes
Programming Programming	AtmoCONTROL software on a USB stick for programming, managing and transferring programmes
Documentation Programming Safety	AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port
Documentation Programming Safety Temperature control Autodiagnostic system Heating concept	AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port adjustable electronic overtemperature monitor and mechanical temperature limiter for fault analysis
Documentation Programming Safety Temperature control Autodiagnostic system	AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port adjustable electronic overtemperature monitor and mechanical temperature limiter
Documentation Programming Safety Temperature control Autodiagnostic system Heating concept	AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port adjustable electronic overtemperature monitor and mechanical temperature limiter for fault analysis
Documentation Programming Safety Temperature control Autodiagnostic system Heating concept Peltier	AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port adjustable electronic overtemperature monitor and mechanical temperature limiter for fault analysis
Documentation Programming Safety Temperature control Autodiagnostic system Heating concept Peltier Standard equipment	AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port adjustable electronic overtemperature monitor and mechanical temperature limiter for fault analysis energy-saving Peltier heating-/cooling system integrated in the rear (heat pump principle)
Documentation Programming Safety Temperature control Autodiagnostic system Heating concept Peltier Standard equipment Internals	AtmoCONTROL software on a USB stick for programming, managing and transferring programmes via Ethernet interface or USB port adjustable electronic overtemperature monitor and mechanical temperature limiter for fault analysis energy-saving Peltier heating-/cooling system integrated in the rear (heat pump principle) 2 stainless steel grid(s), electropolished

Stainless steel interior

Dimensions	$w_{(A)} \times h_{(B)} \times d_{(C)}$: 1040 x 1200 x 850 mm (d less 32 mm for fan - Peltier)
Volume	1060 I
Max. number of internals	14
Max. loading of chamber	200 kg
Max. loading per internal	20 kg

Textured stainless steel casing

Dimensions	w _(D) x h _(E) x d _(F) : 1224 x 1720 x 1005 mm (d +56mm door handle)
Installation	on lockable castors
Housing	rear zinc-plated steel

Electrical data

Voltage	230 V, 50/60 Hz
Electrical load	approx. 1200 W
Voltage	115 V, 50/60 Hz
Electrical load	approx. 1200 W

Ambient conditions

Set Up	The distance between the wall and the rear of the appliance must be at least 15 cm. The clearance from the ceiling must not be less than 20 cm and the side clearance from walls or nearby appliances must not be less than 5 cm.
Ambient temperature	16 °C to 40 °C
Humidity rh	max. 70 %, non-condensing
Altitude of installation	max. 2,000 m above sea level
Overvoltage category	II
Pollution degree	2

Packing/shipping data

Transport information	The appliances must be transported upright
Customs tariff number	8419 8998
Country of origin	Federal Republic of Germany
WEEE-RegNo.	DE 66812464
Dimensions approx incl. carton	w x h x d: 1370 x 1970 x 1300 mm
Net weight	approx. 255 kg
Gross weight carton	approx. 419 kg

Standard units are safety-approved and bear the test marks
